Bright Earth -- a book that I had no knowledge of except that it had ended up on my Reading List, and somehow thought was going to be a novel set in India -- turns out to be a history of the pigments used in artists' paints. He is a regular commentator on the interactions between science, art, history and culture. His previous books include Bright Earth- The Invention of Colour, H2O- A Biography of Water and Critical Mass- How One Thing Leads To Another, which won the 2005 Aventis Prize for Science Books.
