

Download Controlled Burn

A controlled or prescribed burn, also known as hazard reduction burning, backfire, swailing, or a burn-off, is a wildfire set intentionally for purposes of forest management, farming, prairie restoration or greenhouse gas abatement. Controlled Burn is about learning that holding onto the past so tightly makes the present and the future meaningless. And it's about guilt. So much guilt. And it's about guilt. So much guilt. Big thanks to Debbie and Hector for inviting us out to their controlled burn ... and for teaching us the basics about prairie management + pyromancy!, Controlled Burn.
