

Download Early Virginia Families

The goal of the Virginia Early Hearing Detection and Intervention program is to identify congenital hearing loss in children before three months of age and to assure enrollment in intervention services before six months of age. If you have concerns about your baby, call the Infant & Toddler Connection of Virginia at 1-800-234-1448. We're here to help. Many of the First Families of Virginia can trace their ancestry to Pocahontas (1595–1617), a Native American. She was the youngest daughter of Nonoma Winanuske Matatiske and Chief Powhatan, founder of the Powhatan Confederacy. Through grants, the Virginia Department of Social Services (VDSS) funds projects under this program. The projects are designed to provide proven service approaches and strategies to help current and former TANF clients to prepare to enter, succeed, and advance in the workplace., Early Virginia Families.
