Philosophy of mind is a branch of philosophy that studies the ontology, nature, and relationship of the mind to the body. The mind–body problem is a paradigm issue in philosophy of mind, although other issues are addressed, such as the hard problem of consciousness, and the nature of particular mental states. Information Philosophy (I-Phi) is a new philosophical method grounded in science, especially modern physics, biology, psychology, neuroscience, and the science of information. Cognitive science is the interdisciplinary, scientific study of the mind and its processes. It examines the nature, the tasks, and the functions of cognition (in a broad sense). To promote and preserve the integrity of modern science while exploring the harmony between science and the Christian faith., Is Science Compatible With Free Will Exploring Free Will And Consciousness In The Light Of Quantum Physics And Neuroscience.
